

New Media Data Analytics and Application Lecture 11: System Development Case Study

Ting Wang

- Systems Thinking for Product Designing
- A Case Study: Film Box Office Prediction
- To Be A Good Data Analyst

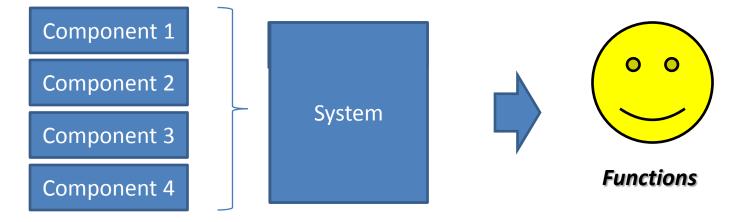

circulating development for your goals Systems Thinking for Product Designing

What is a System?

In computer science and information science, system is a software system which has components as its structure and observable inter-process communications as its behavior.

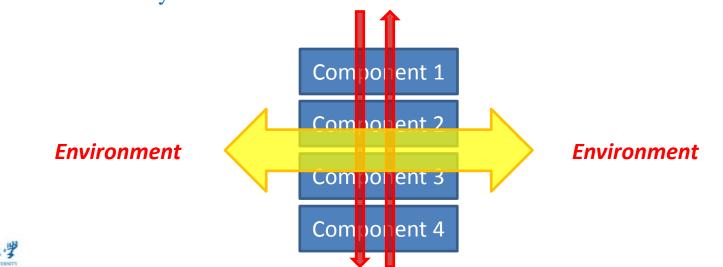

What is Systems Thinking?

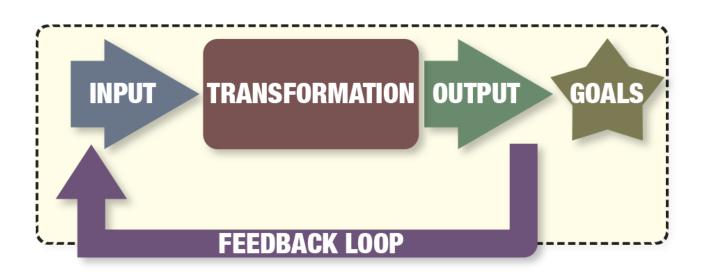

Global, Optimal, and Integrated thinking methodology for software development and operation.

- Interactions between system and its components
- Interactions between system and its environment

Two recommended

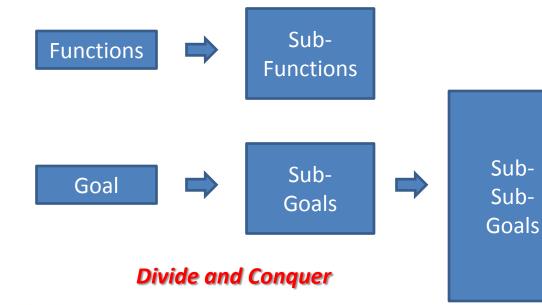

- Systems Thinking Approaches
- Goal Seeking
- Input and output

Goal Seeking (Global optimization) 全局最优

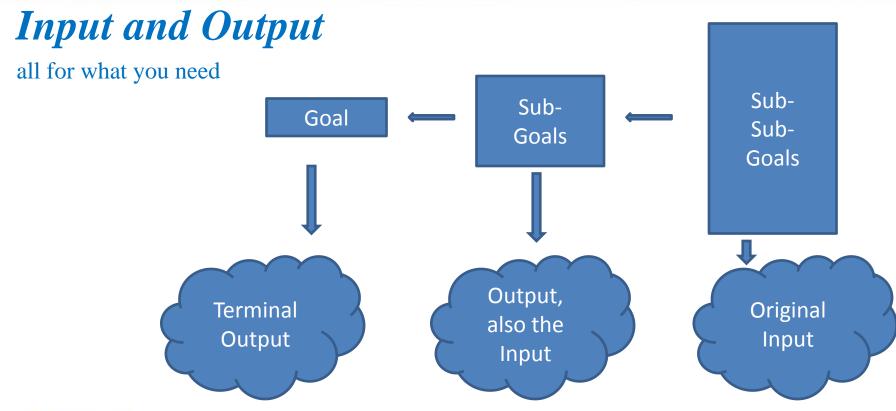

a global optimization of a function or a set of functions according to some criteria

先定一个能达到的小日标

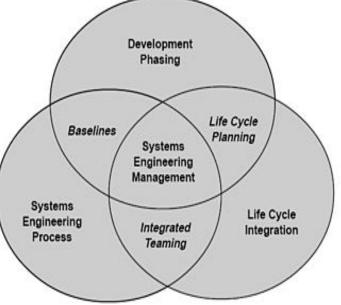

System Engineering 系统工程

ensures all likely aspects of system are considered, and integrated into a whole product. Software Engineering

(in software and information industry)

a case study Film Box Office Prediction

Case Description

Film Box Office Prediction

- is crucial to film investment
- is significant to the market with out Completion Bond
- can be done by a number of approaches

In this case, film box office prediction will be computed based on the information collected by online film news reports.

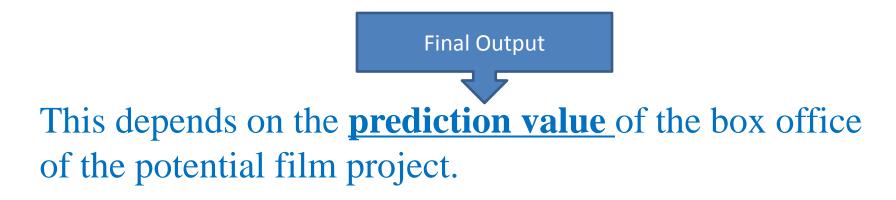

Software Analysis

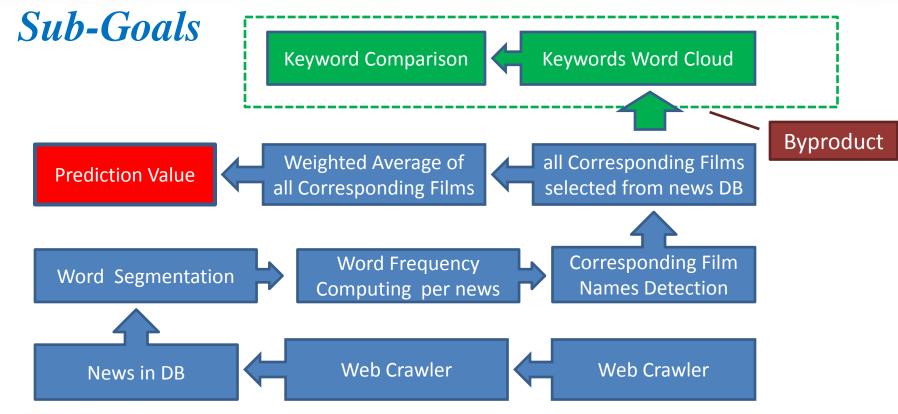

Terminal Goal

To make a decision: whether a film is worth of being invested or not.

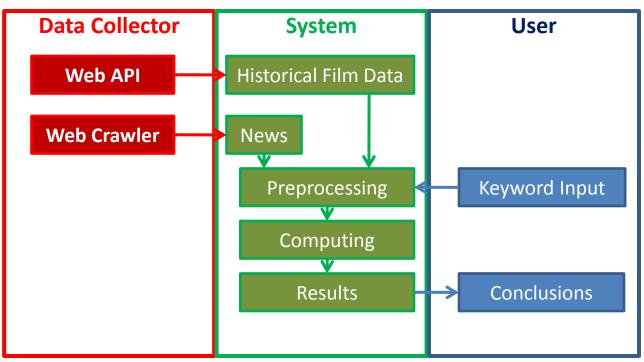

Activity Diagram

Functions

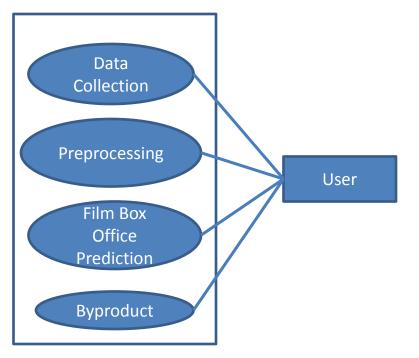

- 1. Film Box Office Prediction
- 2. Byproduct: Keyword Comparison
 - Word Cloud
 - Media Attention
 - Feature Comparisons

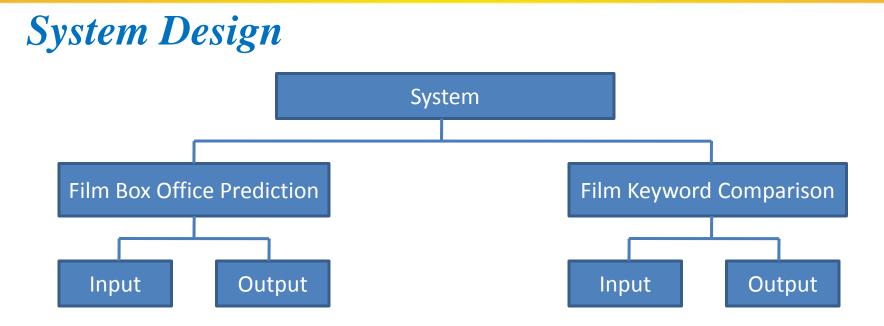

Use Case Diagram

- Input and Output
- Input: Keywords of film name
 - Byproduct: Keywords
 - Other conditions: Word Frequency, Periods,...
- Output: Prediction value of film box office
 - Word Cloud,
 - Media Attention,
 - Word Frequency Comparison

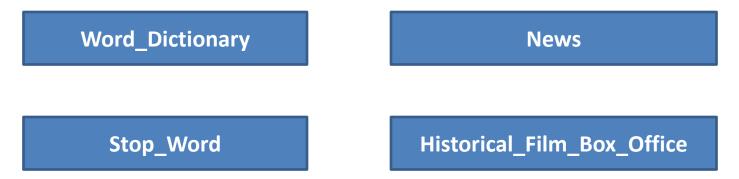

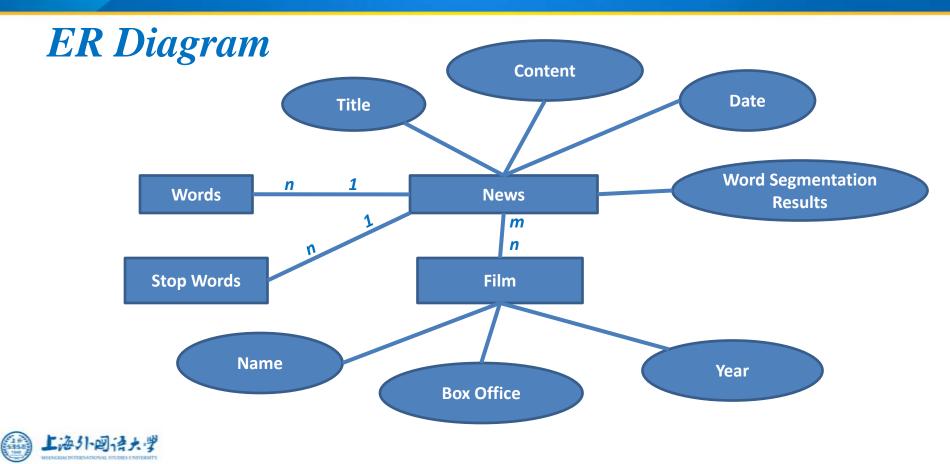

System Arch	itecture			
Weighted Average Computing Word Cloud, Media Attention		Film Box Office Prediction		Byproduct
Historical Film Box Office Records Statistical Computing of News Report		Corresponding Film Detection		News Analysis
Flask, Word Freque	ncy Computing	Keyword Feature Selection	on Keyword Input	
Wor	d Dictionaries	Word Segmentation	Preprocessing	
	My SQL	Database		
上海外回语大学	Python	Web Crawlers	١	Neb APIs

Tips: Film names also can be used for word segmentation.

Computing Steps

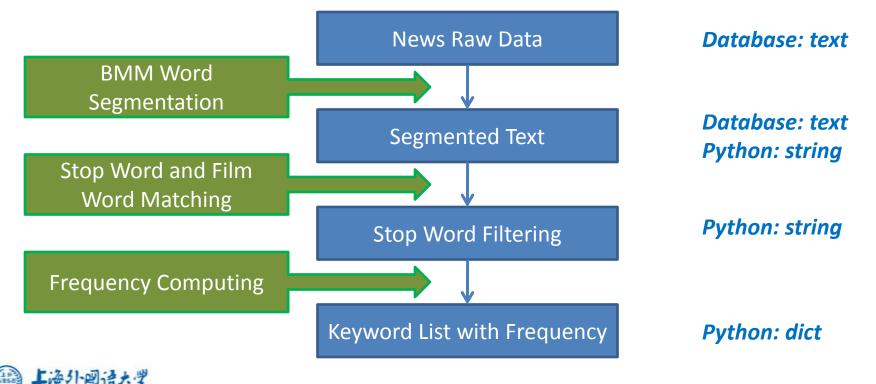

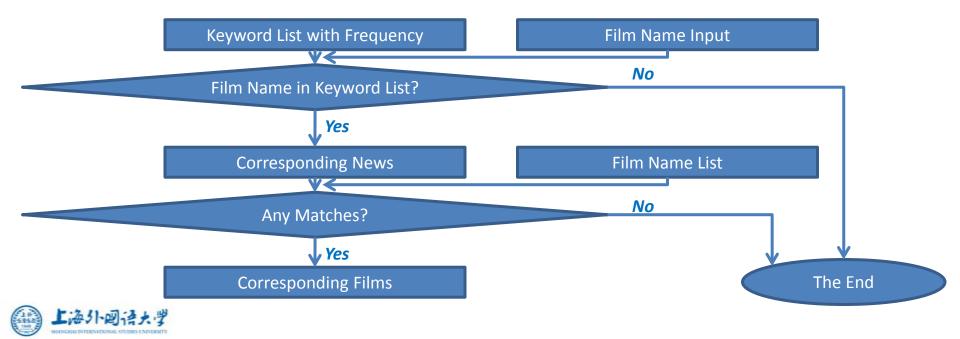

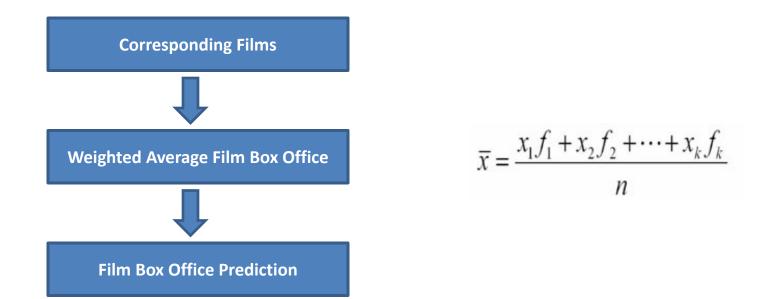

Data Transformation

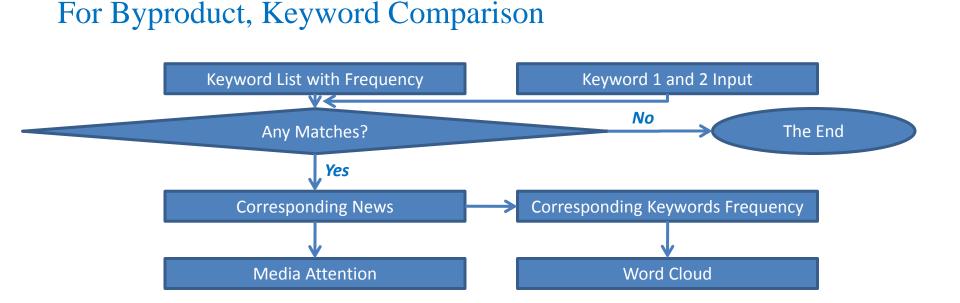

Information Acquisition (From Data to Info.) For Film Box Office Prediction

Prediction and Data Visualization

Text Mining

Software Development

Film Box Office of 长城: 95428.38819320215(x10,000) RMB

Film Box Office Prediction of 长城

Film Box Office Prediction

Film Box Office Prediction

Conclusions

Film Box Office Prediction

What are the shortages of this system?

Do you have any ideas about developing a better one?

tips for your career

To Be A Good Data Analyst

Tip 1

- You have opinions, so do data
- How to read and interpret these data is very important, it depends on your opinions

Tip 2

- Data Quality is always the most important
- Precise Prediction needs good data quality

Tip 3

• Data Analysis is not the end, but a new start. Decision Support is more important.

Tip 4

• To know more about your business, which is more important than to know more algorithms and mathematic models.

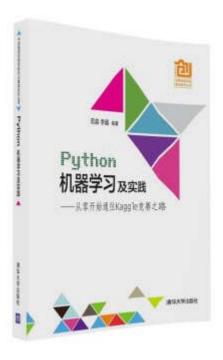

Tips 5

• Conclusions that are not correct, feasible or applicable are useless

About the Final Examination

Examination

- Presentations
 - Show your project using PPT
 - Show your Data Collection processing by Web APIs or Web Crawlers
 - Show your Data Analysis Results with Prediction, Classification, or Clustering.

Examination

• Reports

- What is your project?
- The designing of your program and database
- Your Data Collection approaches
- Your Data Analysis approaches
- A Simulation of your group homework
- Your Conclusion

Examination

- 平时作业(40%)作业,演讲
- •课堂表现(20%)出勤、发言
- 期末成绩(40%)期末报告、总结演讲
 - 任务完成度
 - 任务创新度
 - 程序代码可读性 - 报告可读性

The End of the Course

Thank You
